

Guess the mystery object in a bag or box using only your sense of touch (not sight!!). Try feeling the object with a glove and then without. Which is easiest to guess the object? Before you check if you were right, think of some adjectives to describe how it feels e.g. spiky, prickly, bumpy, rough, smooth, hard, soft etc. Write two words next to each object to describe how it feels. Or, draw and label some of your own objects from your bag.
